

## System Packages

In response to user requests for high-performance car audio systems with easy installation, Clarion is proud to introduce its system packages. Although component selections are easy for users who are knowledgeable about audio systems, it can be extremely difficult for users with little experience. Clarion settles this issue by offering two high-performance packages based on Clarion technology and experience.

The Amigo-1 is a system combining an AM/FM cassette player and 6-disc CD changer. Not only can you enjoy AM/FM radio broadcasts, but you can also listen to music from cassette tapes and the 6-disc CD changer.

The Amigo-2 is a system combining an FM modulator and 6-disc CD changer. This package allows users who already have an FM radio in their car to enjoy music from a 6-disc CD changer. In this way, Clarion's system packages allow you to easily enjoy the best possible car entertainment experience.

### Amigo-1

#### AX330 AM/FM CASSETTE RECEIVER WITH C-BUS CONTROL AND C-BUS 6-DISC CD CHANGER

##### AX330

###### Tuner Features:

- 20FM/5AM Presets

#### Play Back CD Sound on Any FM Car Radio

The FMC250 controls a Clarion CD changer and plays back the sound via your FM car radio — no matter which brand. The FMC250 hideaway unit connects between your FM radio antenna input and the car antenna. Simply tune your radio anywhere from 87.7 to 89.9MHz (0.2MHz step 12-point) and listen to superior Hi-Fi CD sound in full stereo from the connected Clarion CD changer.

New 1/2 DIN Equalizer with 7 bands of adjustment, and built-in highpass and low pass crossovers with subwoofer level control

A versatile crossover with inputs for either a three-way system, or a two-way system with front and rear fader control. A wired remote subwoofer level control is included.
