Full Digital Sound

Vision and foresight at the core of every product

Clarion was founded in 1940, and ever since developing Japan's first car radio in 1951 has continued to actively develop breakthrough technologies and launch innovative products. Clarion's trusted technologies are incorporated by leading car manufacturers all over the world, under our brand name or otherwise, and are playing a key role in enhancing the relationship between people and their vehicles.

Clarion's original research and development expertise has been the driving force providing not only entertainment, but also a safer and more secure driving environment for many generations. And by accommodating the convergence of cars and networks, people's cars are rapidly becoming one of the most fulfilling places to experience high-quality digital content and access a wealth of information.

clarion

Corporate Commitment

To improve society by seeking to develop the relationship between sound, information, and human interaction, and by creating products that meet those needs.

Corporate Vision

The connection between sound and information communication in the mobile environment of the car will evolve into new domains based on our unique ideas and advanced technologies. Through this, we will provide safety, security, comfort and excitement to our customers all over the world. We at Clarion will remain at the forefront of the industry, as we accurately identify the needs of the market and realize long-term growth.

Bright future through brilliant technologies

The world's first Full Digital Sound

Clarion was the first manufacturer to develop and market the full digital speaker, which balances premium sound with eco friendliness. Through a collaboration of Dnote digital signal processing technology and Clarion's own in-car acoustic technologies, the full digital sound system successfully achieved a totally digital-to-digital signal transfer from the digital source all the way to the speaker.

Advanced image recognition and processing for a safer drive

Clarion is actively involved in Intelligent Safety, which utilises image recognition and image processing technologies to support users in driving and parking. Development includes an all-round-view camera that visually displays information on the vehicle's immediate surroundings.

Apple CarPlay™ compatible for an advanced driving experience

Apple CarPlay is the smarter, safer way to use iPhone in your car. Apple CarPlay seamlessly integrates your iPhone® with NX807. Now you can make phone calls, access your music, send and receive messages, get directions, and more while you stay focused on the road.

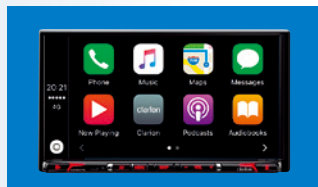

Enjoy long drives with family and friends

Clarion offers a line-up of car navigation systems geared especially for camping vehicles — they even remove routes that are legally inaccessible to camping vehicles automatically, and display camping facility information, including pictures. The latest advances, such as Apple CarPlay, are supported. Use voice commands, such as search, and enjoy music stored on your smartphone or USB device. Make the most of your long-haul excursions with family and friends.

Full Digital Sound

From source to speakers, digital-to-digital changes audio

Full digital signal transfer from a digital source enables direct input of high-resolution audio sources to the speakers without loss. High-quality full digital sound is reproduced, with purity that's true to the original. High efficiency conversion from digital signals into sound makes the system capable of delivering 4 times the high power output of conventional Full Digital Sound Systems^{*1}, while achieving low power consumption that's only about 1/5th that of analogue systems^{*2}.

^{*1} Compared to other Clarion references.

(Conventional Full Digital Sound Systems were only sold in the Japanese market)

^{*2} Compared to the driving circuit of a typical factory original audio system.

Conventional System

Full Digital Sound System

^{*} Trigen Semiconductor's Dnote technology is used for digital signal processing. Dnote is a registered trademark of Trigen Semiconductor, Inc.

Digital sound processor delivers versatility

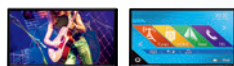

Digital sound processor accommodates factory original centre unit as well as those from other manufacturers, and external digital audio equipment. The ability to connect analogue speakers also contributes to the system's versatility.

Optical digital output for assured Clarion connectivity

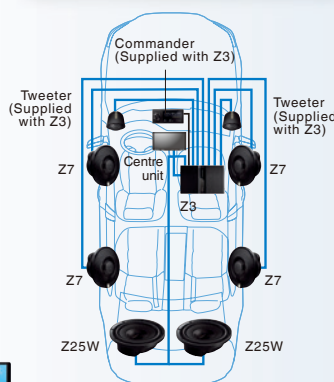

If the centre unit is a Clarion car navigation system (Digital output compatible), it's easy to create a full total digital system and enjoy leading-edge digital sound.

NX807E, NX807E C, NX706E, NX706E C

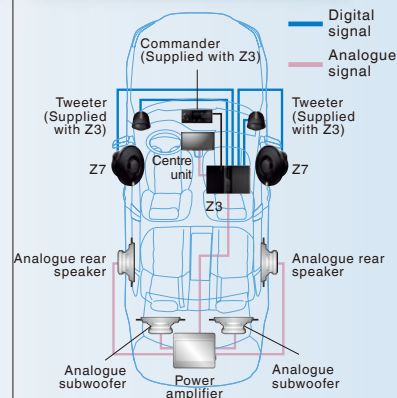

^{*} Check the Clarion website for connectable models.
<http://www.clarion.com/xs/en/products-personal/multimedia/>

Example of Full Digital Sound system

Example of mixed system including analogue system

World's first^{*3} dedicated LSI for automotive grade – originally developed by Clarion

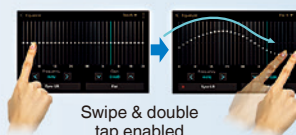

Clarion developed the first dedicated LSI for automotive grade that efficiently converts digital signals into sound, helping to achieve higher quality playback of Full Digital Sound, while ensuring efficient energy consumption.

^{*3} As of September 2015 (Clarion research)

Intuitive tuning using your smartphone or tablet

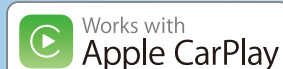

By installing an application on your smartphone or tablet, you can enjoy high-precision sound tuning like Crossover, Time Alignment and Equaliser and more with an intuitive touch operation. Fine tuning of each parameter can be done with a few simple steps.

Drive your driving environment

NX807E

2-DIN DVD multimedia station with built-in navigation & 17.8 cm (7-inch) touch panel control

Made for iPod iPhone

NX807E

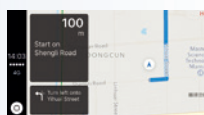

Apple CarPlay™ compatible for an advanced driving experience

Enjoy safer operation of your iPhone® features in your car — make calls, listen to music, or even send and receive messages, get directions, and more while you stay focused on the road.

Phone

Maps

■ Phone

Apple CarPlay works with Siri so you can access contacts and make calls, redial, and listen to stored messages by voice activation.

■ Music

Siri lets you play music from your iPhone just by saying the tune, artist name or genre. It supports Apple Music® so you can get the latest tunes.

■ Apps

Apple CarPlay works with your iPhone apps, so your enjoyment is limitless including Music, Audiobooks, Podcasts, and beyond.

Gyro sensor and vehicle speed pulse sensor for high-precision car navigation

The internal gyro sensor enables the vehicle's location to be followed even in long tunnels where GPS reception is poor. The vehicle speed pulse sensor provides higher-accuracy car navigation.

Line-up of DAB-ready models to meet your needs

Clarion offers a selection of DAB-ready source units which allow easy, direct connection of the DAB404E receiver.

*Compatible with NX405E, NX405E C, NX706E, NX706E C, NX807E, NX807E C, VX404E

Upgrade your sound with polished compact design and unwavering power

XC1410

300 W micro size
4-channel power
amplifier

XC1410

Features

- 300 watts of maximum power output
- 75 watts x 4 channel @ 2-ohms
- 50 watts x 4 channel @ 4-ohms
- Selectable sensitivity Low / High
- Class D power supply and output stages
- Power MOS-FET switching transistors
- Soft turn-on and turn-off circuitry
- Ground loop isolation circuit

MOS-FET power amp

There's only one way for Clarion's main units to deliver unyielding power output and linearity: MOS-FET amplification, or metal oxide semiconductor field effect transistor amplification. Smaller and more efficient than conventional power supplies, a MOS-FET amplification circuit delivers power with less distortion and zero on / off switching noise. This means you can crank up the volume or set it to easy listening. Either way, your sound will be crystal clear.

Circuit design achieves high-quality sound.

Circuit design achieves high-quality sound. Clarion amplifiers feature uncompromising resistance to magnetic noise, thereby minimising distortion. The result is high-quality sound you can enjoy in a variety of systems.

Advanced technologies in micro size

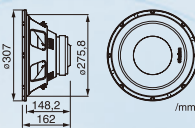

XC1410, despite its compact dimensions, is a superb D-class 4-channel amplifier realising astounding sound output.

2-ohm stability

Utilizing this design for peak performance and unwavering reliability, Clarion's amplifiers can drive lower impedance loads for increased power.

More gravity for the bass line

Made for safer driving Safety cameras and monitor systems

Cameras

COMMERCIAL VEHICLE REAR CAMERA

Durable design, low distortion, low ghosting
front guard shutter included (CC6500E only)

CC6500E

CMOS colour camera
(with shutter)
(wide-angle / mirror image)

CC6600E

CMOS colour camera
(without shutter)
(wide-angle / mirror image)

Main features of the CC6500E / CC6600E

- Rugged, reliable and durable, high-quality camera system is built from the ground up with all-original parts.
- Latest-generation CMOS sensor with 330,000 pixels which offers low-noise night-time images.
- Fluorine coating on shutter prevents dirt and snow from clinging.

IR ILLUMINATED COMPACT COLOUR CCD CAMERA

Dynamic range function and infrared illuminators
improve the driver's visibility in dark situations

CC2020E

IR illuminated colour CCD
camera
(wide-angle / mirror image)

Features

- Dynamic range function improves the camera image clarity in both light and dark situations.
- 5 built-in infrared emitters.
- Built-in microphone.
- Built-in heating element ensures the camera is ready for use at all times.
- Weather-resistant die-cast aluminium housing.
- Electronic iris.
- Can also be connected to a universal monitor with a composite (RCA) input terminal via the dedicated conversion cable (CCA730). (12V vehicles only)

CMOS COLOUR CAMERA

CC520

CMOS vision assist
camera

CC520

CC720

CMOS vision assist camera
(true / mirror image)

CC720

Defeatable distance guide lines (red, orange, yellow, green) make parking a cinch

By connecting the CC520, CC720 to a Clarion navigation multimedia unit, you'll be able to view different coloured guide lines to indicate the distance from your vehicle to a safe stopping point.

MONITOR SYSTEM

CJ5600E

5.6-inch colour LCD
monitor

5.6inch
Monitor

CJ5600E

CJ7500E

7-inch wide colour LCD
monitor

7inch
Monitor

CJ7500E

CJ7600E

7-inch widescreen digital
LCD monitor

7inch
Monitor

CJ7600E

EA2182E

4 camera
control box

EA2182E

- Stand-alone mode to provide 4-screen display
- Hazard lights recognition
- ND connector working under Locke

SurroundEye system

SurroundEye

Safe driving support system — SurroundEye

Bird's-eye images captured by multiple vehicle-mounted cameras are displayed on the monitor inside the vehicle. By providing views of areas that are dead angles for the driver, this system supports safer driving.

CC6300E

Ultra wide angle compact CMOS camera (160°true image)

EG2300E

SurroundEye camera controller

RCB210

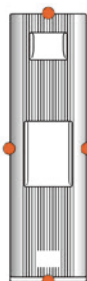

Selector switch

Buses

Camera mounting positions

4 Cameras

- Front centre: CC6300E (160°true image)
- Rear centre: CC6300E (160°true image)
- Left side: CC6300E (160°true image)
- Right side: CC6300E (160°true image)

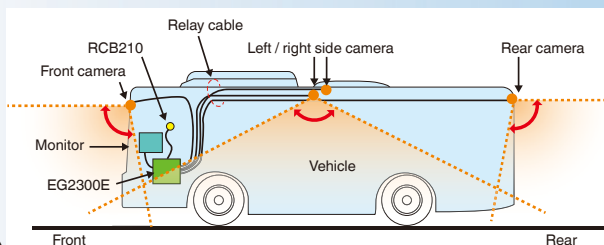

Display interlocking

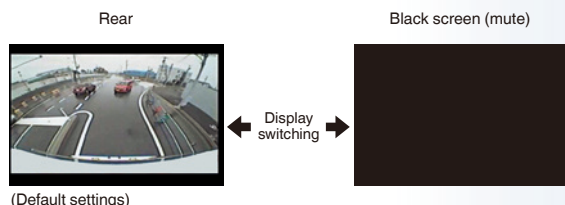

- Backup signal
- Left turn signal
- Right turn signal
- Middle door

Applicable buses

Buses with middle doors
(Total length: Approx. 9 to 12 m)

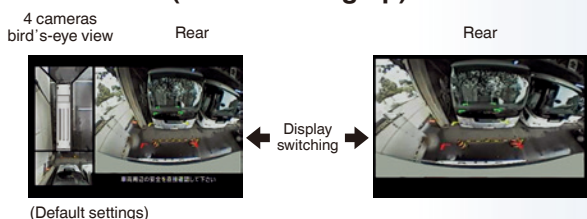

4 cameras (when turning right and left)

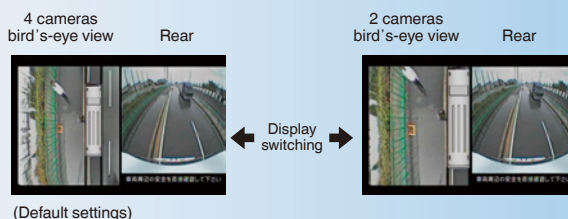

4 cameras (when turning right and left)

4 cameras (when backing up)

4 cameras (middle door open)

Engineered for the marine environment

CMS4

"Black box" digital media receiver with watertight commander

Made for
iPod iPhone

Bluetooth aptX CSR

MP3/WMA USB AUX INPUT

CMS4

Full 4-Zone Entertainment

Clarion's CMS4 is the ultimate media hub that was developed to enhance the user interface and audio experience.

- Bluetooth aptX for high-quality stream
- 7-Band graphic equaliser
- 4 Zone audio volume control

GR10BT

USB / MP3 / WMA gauge receiver with no black box

Bluetooth

MP3/WMA USB AUX INPUT

GR10BT

Bluetooth for stereo audio streaming

Built-in Bluetooth provides stereo streaming with a wide variety of Bluetooth compatible devices. Play music stored on your connected Bluetooth device, whether it's a mobile phone or a portable audio player, with wireless convenience.

* Depending on mobile phone.

CMV1

Watertight DVD / CD / USB receiver

Notes

• "Made for iPod" and "Made for iPhone" mean that an electronic accessory has been designed to connect specifically to iPod or iPhone, respectively, and has been certified by the developer to meet Apple performance standards. Use of the Apple CarPlay logo means that a vehicle user interface meets Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod or iPhone may affect wireless performance. iPhone, iPod and Siri are trademarks of Apple Inc., registered in the U.S. and other countries. Apple CarPlay is a trademark of Apple Inc. • Android™ is a trademark of Google Inc. • Manufactured under license from Dolby Laboratories. Dolby, Dolby Audio, Pro Logic, and the double-D symbol are trademarks of Dolby Laboratories. • The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Clarion Co., Ltd. is under license. Other trademarks and trade names are those of their respective owners. • DivX®, DivX Certified® and associated logos are trademarks of DivX, LLC and are used under license. DivX Certified® to play DivX® video, including premium content. Covered by one or more of the following U.S. patents: 7,295,673; 7,460,668; 7,515,710; 7,519,274 • Smart Access logos and trademarks are the property of Clarion Co., Ltd. • The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries. • All other trademarks and commercial names are the property of their respective owners. • microSDHC Logo is a trademark of SD-3C, LLC.

• Specification and design are subject to change without notice. • Photos are non-binding. The manufacturer and importer do not take responsibility for any printing errors. • All other trademarks are the property of their respective owners. • All units in this catalog are primarily intended for installation in passenger vehicles. Use in commercial trucks, tractors, off-road vehicles, construction machinery, boats (except Marine models), and other special-purpose vehicles or on motorcycles is not recommended. • It may not be possible to resume iPod Video playback. Whenever ACC is turned OFF / ON, playback will commence from the beginning of the file. • There's no guarantee that all units in this catalog play CCCD (Copy Control CD), Hybrid SACD (Super Audio CD), CD-R / RW and DVD±R / RW. • Please see the Clarion website for iPod models that can be connected. • Clarion's navigation systems should not be used as a substitute for your own judgement. Any route suggestions made by a Clarion navigation system should never override any local traffic regulations, your own judgement, and/or knowledge of safe driving practices. Disregard route suggestions by the navigation system if such suggestions would: cause you to perform a hazardous or illegal maneuver, place you in a hazardous situation, or route you into an area you consider unsafe. • The advice provided by the navigation system is to be regarded only as a suggestion(s). There may be situations where the navigation system displays the vehicle's location incorrectly, fails to suggest, and/or fails to direct you to your desired destination. In such situations, rely on your own driving judgement, taking into account current driving conditions. • Do not use the navigation system to route you to emergency services. The database does not contain a complete listing of locations of emergency service providers such as police, fire stations, hospitals and clinics. Please use your judgement and your ability to ask for directions in these situations. • Smartphone compatibility may vary by model and operating system. Please check www.clarion.com for details. • In order to avoid a traffic accident or traffic offense, remember that actual road conditions and traffic regulations take precedence over the information contained in the navigation system.
