

Clarion®

Our Experience Enhances Yours

Welcome to the 2012 lineup from Clarion. A fully satisfying selection of exactly what you need to power-up your drive. From multimedia head units that easily integrate your everyday entertainment, intelligent car audio systems, and high quality audio units, to power amps that add muscle to your music, and speakers and subwoofers for sound that stands out in the crowd. At Clarion, we bring what's next to you first. Count on our experience to enhance your mobile lifestyle.

Clarion is not necessarily a household name, and for a good reason — you won't find us in the home! That's because Clarion specializes in creating high quality entertainment products exclusively for use in your car.

We don't do a little of this and a little of that. We're in-car experts, period, and have been for over 70 years. And to let you in on a little secret — our products are factory installed in quality cars by over 34 car manufacturers worldwide, including Ford, GM, Chrysler, Toyota, Nissan, Honda, Hyundai, and more. The people who know us trust our products.

Our tradition of innovation has made it possible to be at the forefront of car entertainment, year after year, and our track record is full of world's firsts and Japan's firsts. But that's history, and what really counts is what the exciting innovative future holds.

Maximize Your Drive Time Enjoyment.

MULTIMEDIA / NAVIGATION

The Leading Edge Driving Experience

Clarion's multimedia lineup includes flexible car navigation solutions complemented with a wide array of audio visual capabilities, so the road ahead will always be both efficient and entertaining. Touch screen operation with support for flick operation lets the user interact with the source unit similar to how you would directly on an iPhone®. Experience a higher level of digitally-driven satisfaction, with Clarion.

SOURCE UNITS

Superior Audio Connectivity and Flexibility

Clarion's in-car audio features a sharp and vivid design that integrates nicely with a wide range of interiors. Compatibility to the latest digital media such as PANDORA® internet radio via iPhone/iPod touch™ USB connection, iPod® and Bluetooth® let you bring your world, seamlessly, into your car. And our commitment to sound quality led us to adopt MOS-FET power amps for all of our main units.

AMPLIFIERS / SUBWOOFERS / SPEAKERS

The Power to Really Drive Your Music

Clarion's amps, subwoofers and speakers are ready to blow the competition away. Reproducing superior sound at high output levels is a science, and Clarion is up to the challenge. The result is a full lineup of devices that have a direct impact on what you hear and how you look. Sound purity even with the volume cranked up, plus eye-catching extreme design to get you noticed, that's Clarion.

MARINE AUDIO SYSTEMS

Ride the Waves with Sound You Can Sea

Borderless in the extreme, you can take your favorite tunes out of the car and out to sea — with Clarion's watertight heavy-duty source units and components. They're engineered to take on the spray, salt and fog, and just keep going. Install Clarion in your vessel, and make your next cruise a real splash, filled with knots and knots of nautical entertainment.

NAVIGATION

The Ultimate Multimedia, Navigation and Connectivity Solution.
